

1 I Claim:

2 1. A sports memorabilia apparatus comprising:

3 a. a medallion having a display surface;

4 b. a puck;

5 c. means for said puck to releasably engage said
6 medallion;

7 d. indicia, said indicia appearing on said display
8 surface of said medallion whereby said indicia is displayed
9 on said medallion when said medallion and said puck are
10 engaged.

1 2. The apparatus of Claim 1 wherein said indicia is
2 embossed upon said display surface of said medallion.

1 3. The apparatus of Claim 2, said means for said puck to
2 releasably engage said medallion comprising: said puck
3 defining a cavity, said cavity having an interior surface,
4 said interior surface releasably engaging said medallion.

1 4. The apparatus of Claim 3, said means for said puck to
2 releasably engage said medallion further comprising: a
3 retaining member engaging said medallion and said interior
4 surface of said puck.

1 5. The apparatus of Claim 4, said retaining member
2 comprising a spring.

1 6. The apparatus of Claim 4, said retaining member
2 comprising a resilient retaining member.

1 7. The apparatus of Claim 3 wherein said puck is composed
2 of a resilient puck material and said medallion is composed
3 of a substantially rigid medallion material.

1 8. The apparatus of 7, said means for said puck to
2 releasably engage said medallion further comprising: said
3 interior surface of said cavity having an interior
4 dimension, said medallion having an external surface, said
5 external surface having an external dimension, said
6 external dimension and said internal dimension being
7 selected so that said interior surface of said cavity
8 exerts a pre-selected force against said external surface
9 of said medallion when said puck and said medallion are
10 engaged.

1 9. The apparatus of Claim 8, said means for said puck to
2 releasably engage said medallion further comprising: said
3 external surface of said medallion engaging said interior
4 surface of said cavity at an area of contact, said interior
5 surface of said cavity being configured to pre-select said
6 area of contact when said puck and said medallion are
7 engaged.

1 10. The apparatus of Claim 9, further comprising:
2 secondary indicia appearing on said puck or said medallion.

1 11. The apparatus of Claim 9, further comprising: means
2 for displaying said puck and said medallion engaging said
3 puck.

1 12. A sports memorabilia apparatus comprising:

2 a. a medallion having a display surface;

3 b. a puck adapted to engage said medallion; and

4 c. an indicium appearing on said display surface.

1 13. The apparatus of Claim 12 wherein said engagement
2 between said puck and said medallion is a releasable
3 engagement.

1 14. The apparatus of Claim 13, said adaptation of said
2 puck to engage said medallion further comprising: a cavity
3 defined by said puck, said cavity having an interior
4 surface.

1 15. The apparatus of Claim 14, further comprising: a
2 retaining member releasably engaging said puck and said
3 medallion.

1 16. The apparatus of Claim 15 wherein said retaining
2 member comprises a resilient retaining member or a spring.

1 17. The apparatus of Claim 14, further comprising: said
2 interior surface of said cavity engaging said medallion at
3 an area of contact, said interior surface of said cavity
4 being configured to pre-select said area of contact.

1 18. The apparatus of Claim 15 wherein said interior
2 surface of said cavity being configured to apply a
3 predetermined force against said medallion when said
4 medallion and said puck are in engagement.

1 19. The apparatus of Claim 18, further comprising:
2 secondary indicia appearing on said puck or said medallion.

1 20. The apparatus of Claim 19, further comprising: a base;
2 an upwardly projecting pin attached to said base; a hole
3 defined by said puck, said pin engaging said hole.
